

Welcome to the Michigan Hackers Security Team!

If you have any questions, direct them to **@Justin Hutchins** on Slack or in person!

Welcome to **Michigan Hackers**! We're excited to see you're interested in joining the security team this year. This year the security team will be working together virtually to prepare for CTF (Capture the Flag) competitions, in which individuals or teams compete to capture passwords (flags) hidden on a computer using security tools and creative hacking. CTFs are one of the best ways to engage with computer security concepts and develop experience in the field. There will also be a new industry tool introduced each week along with a variety of career development resources.

The purpose of this document is to help you onboard onto our team and make the transition easier

To join the Security Team:

1. Join the Michigan Hackers Slack: bit.ly/mhslack
2. Create a [GitHub](#) account if you don't already have one
3. Once you've joined Slack, message **Justin Hutchins** your username and GitHub username to get access to:
 - a. The Security Core Team Slack channel
 - b. Our Google drive
 - c. The Michigan Hackers GitHub organization
 - d. Push and pull access to the [Security Team GitHub repository](#)
4. Take a look at our [Google Drive](#)
5. Add your info to the 20-21 Security Team [roster](#)
6. Add a photo of yourself to Slack and GitHub
 - ~ This helps our team put names to faces
7. Complete [Project 0](#)

If you have any questions, feel free to reach out to **@Justin Hutchins** on Slack.

Note: All of this information can be found in the [Security Team GitHub repository](#).
